

# Ferns

## Light

Low indirect light.

## Temperature

Room temperature (60-75F) year round is preferred.

## Water

Water regularly, but do not overwater. Soil should be evenly moist. Mist foliage in winter months.

## Humidity

Enjoy high humidity, will thrive in bathroom setting.

## Fertilize

Feed between March & October, but not in winter.

## Repotting

When fern fills pot, in spring for best results.
