

# Ficus & Figs

## Light

Bright, indirect light.

## Temperature

Room temperature (60-75F) year round is preferred.

## Water

Allow soil to dry slightly between waterings.

## Humidity

Enjoy humidity, will thrive outdoors in summer in a shaded spot.

## Fertilize

Feed three times a year (spring, summer, fall) with an all-purpose fertilizer.

## Repotting

In Spring when plant will naturally have a growth spurt, and before it becomes root bound in its pot. Choose a slightly larger pot, too big will cause extra stress.
