

# Succulents & Cacti

## Light

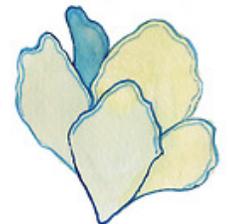

Bright light with some direct sun.

## Temperature

Room temperature (60-72F) year round is preferred. Not below 64F

## Water

Allow to dry between waterings.

## Fertilize

Every other week during spring and summer months with blossom booster, or during the rest of the year with all purpose.

## Repotting

Once plant becomes pot bound, use a light-weight soil specific to succulents and cacti.
