

Croton

Light

Bright light to full sun. Colors will fade with too little light.

Temperature

Above 60F at night and between 75-85F during the day is ideal.

Water

Evenly moist soil, will wilt quickly if not watered enough.

Humidity

Recommended humidity is between 40 and 80%.

Fertilize

Regularly, especially when weather is warm and plant is growing.

Repotting

When the plant seems to be growing out of its pot, plant in a pot 1-2" wider than the original pot.
