

READY FOR FALL: BUCK RUB TREE PROTECTION

Young tree not protected.

Don't wait! Pick up buck rub protection for your young trees today.

End of summer thru winter is the time when young trees are most susceptible to bucks. Bucks have the natural urge to rub the velvet off of their antlers and want to spread their scent in a territory.

Young tree protected.

The result? Your newly planted trees will lose its bark, and with it, winter protection. Here at The Farm we have options to help your trees survive the buck season.
